

Accenture Design Test

July 2025

Design Brief – Option 1

Problem Statement

Gen Z is environmentally conscious, digitally native, and expects seamless, personalized experiences across devices and real-world interactions. **Sulekha** is a new subscription-based fashion rental service designed for Gen Z urbanites who want to access the latest trends sustainably — by renting, exchanging, or purchasing pre-loved outfits.

This service works through an app, website, social media, pop-up stores, and peer-to-peer exchanges, creating a rich omnichannel experience.

What's needed?

- User Persona(s)
- Service Blueprint
- Omnichannel Journey Map
- Key Screens Design
- Design Rationale
- Design Solution

Design Brief – Option 2

Problem Statement

Gen Z and Millennials (18-35) increasingly face lifestyle-driven chronic conditions like diabetes, PCOS, anxiety, or hypertension—but they're also hyper-connected, mobile-first, and AI-curious. Despite growing health awareness, they are often: Skip follow-ups Struggle with information overload

Depend on fragmented apps with little personalization.

They expect instant, contextual support—but current systems feel outdated, bureaucratic, or non-intuitive.

Key Areas to Consider:

Patient Journey: How does a patient transition from hospital discharge to daily self-care?

Touchpoints: How does the experience combine digital (apps, chatbots, wearables) and physical (home visits, clinics) interactions?

Agentic AI: How does AI provide personalized coaching, detect risks, adapt content to literacy/context, and escalate issues to caregivers or doctors when needed?

Service Design: How do frontstage (user interactions) and backstage (clinicians, data, care teams) processes work together?

Behaviour Change: How does the design support motivation, trust, and adherence?

What's needed?

- User Persona(s)
- Service Blueprint
- Patient Journey Map
- Key Screens Design
- Design Rationale
- Design Solution

Design Brief - – Option 3

Problem Statement

Gen Z is stepping into adult financial life with new expectations — they crave real-time access, personalized advice, and a sense of progress. But they also want money management to feel rewarding, engaging, and even fun —not stressful.

The Ace bank wants to launch a next-generation personal finance experience that helps new generation understand, manage, and grow their money, but also makes them feel motivated through gamified elements like challenges, streaks, rewards, and community.

This is not just an app — it's a connected service combining a mobile app, web portal, smart notifications, social communities, physical branch touchpoints, and personalized coaching, all tied together through service design and trending tech.

The Challenge:

Design an omnichannel service experience for a Gen Z customer that: Makes managing money simple, intuitive, and rewarding.

Combines digital (app, web, chatbots, wearables) and physical (branches, ATMs, financial coaches) touchpoints.

Uses emerging tech (AI, predictive insights, personalization, AR/VR if relevant) to deliver real value.

Integrates gamification thoughtfully: e.g., spending challenges, savings streaks, badges, community leaderboards, or social sharing.

Builds trust, good habits, and a sense of progress

Option 3 Continued...

Key Areas to Address:

Onboarding & Discovery: How does a Gen Z user learn about and sign up for the service?

Daily Engagement: How do gamified features motivate users to stay on top of spending, saving, or investing?

Omnichannel Support: How do they get support from a digital coach, community, or in-branch expert?

Tech & Rewards: How do AI, smart nudges, and gamified tasks work together?

Service Design: How do the frontstage user interactions connect with backstage processes?

What's needed?

- User Persona(s)
- Service Blueprint
- Patient Journey Map
- Key Screens Design
- Design Rationale
- Design Solution

Tips

Don't just add points or badges — show **how** gamification motivates better money habits and why it feels right for Gen Z. Think real-world + digital. Keep it fun but meaningful!
